

I am using this email to strongly urge the FCC to not try to dictate what I may hear on my xm satellite radio. I pay for the service for a reason, its called VARIETY..... I am so tired of the same old bland radio blah blah that is on regular broadcast stations. If i pay to listen to what I choose to listen to why should it be up to NAB to tell me what I can and cannot listen to? I love my xm radio and would not give it upthe variety is what keeps me, and now more than ever, since they have added the weather and traffic channels! You cant get local broadcast radio to give you up to the minute traffic unless its rush hour! For instance within a matter of minutes on a comute I was on yesterday there was an huge accident in the middle of a busy intersection.....it was on my traffic report within MINUTES! Now tell me if thats not a service we all need! I urge the FCC to reject the petition 04-160 you should support this kind of radio and not hinder its futur! e!

Thank you,
Angela Miller
